Every day becomes
an opportunity.

KEY CANNABINOIDS FOUND IN SEEDLING PRODUCTS:

CBD (Cannabidiol): CBD is a non-intoxicating cannabinoid that is widely recognized for its potential therapeutic benefits. CBD is known for its calming and balancing effects, helping to promote general wellness. In these gummies, CBD is included to complement the effects of D9 THC and THC-P, providing a well-rounded experience, and supporting overall well-being.

CBG (Cannabigerol): Studied for anti-inflammatory, neuroprotective, and mood-enhancing properties.

CBN (Cannabinol): Known for sedative and sleep-promoting properties.

CBC (Cannabichromene): Investigated for anti-inflammatory and neuroprotective benefits.

THC-V (Tetrahydrocannabivarin): Known for potential energy-boosting and stimulating effects.

THC-P (Tetrahydrocannabiphorol): THC-P is a cannabinoid that has gained attention for its potential to have a stronger affinity for the body's cannabinoid receptors compared to other cannabinoids. THC-P is believed to offer unique benefits and has therapeutic potential.

Hemp-Derived D9 THC: Provides relaxation without overwhelming psychoactive effects.
